PRESS RELEASE:

July 1, 2014:

EZ-CLEAN CONVENTIONAL POUCHES

Drainable P/N 7-EZCON-0114

Disposable P/N 7-EZDISP-1214

Made in the USA

Schena Ostomy Technologies, Inc. is pleased to offer a one piece conventional Drainable Pouch and a one piece Disposable Pouch. Made in the USA and designed to provide flexible, comfortable skin friendly wafer attachment for Ileostomy and Colostomy patients. Clear plastic film permits new ostomates to easily apply the wafers which have a perimeter seal border to extend wear time. The stagger welded Hydrocolloid wafer is body temperature heat sensitive and will stick well to properly prepared skin. Call for Samples.

The Drainable Pouch has a high volume waste capacity and is equipped with a skin comfort layer and a wide drain opening to make cleaning convenient. A flexible lock strip at the end of the drain also opens the bottom when formed into a W to make the cleaning process easy. Retrofit manifold kits, available from Schena Ostomy Technologies can be easily installed on the pouch to allow use of the EZ-Clean water feed systems. Available: Box of ten (10).
