

When I was asked to give the Senena EZ Clean System a trial run, I was skeptical. I knew that colostomates had found it to be a wonderful innovation. But, I have been an ileostomate for 11 years, and have become accustomed to having a completely clean pouch only when I change it!

I am a skeptic no longer. While the pouch still continually fills, when I empty and clean it, I do feel better! I know it is clean at least once every few hours. It has given me a new lease on life and improved my self image.

The EZ Clean lives up to its name - it is easy, takes only a few moments to use, and gives you a refreshed feeling. I can, without reservation, recommend it to ileostomates.
